WEEKLY CHECK-IN

HANS PUJALTE (PUJA0009)

COMP3742, TONSLEY
COMPLETED: 11/10/2026

Hans Pujalte

Question 1 Progress: What did you accomplish this past week? Any issues slowing down progress?

- Completed and submitted Artefact 1
- Completed Lab 8 and answered questions
- Want to have a short break before working on Artefact 2
- First weekly checkin, yay

Question 2 Plans: What are your goals for the next week? How does this match against your overall project plan?

- Start discussing group contributions for Artefact 2
    - Finalise what our AI system will try to do since we've kept it quite general in Artefact 1
- Catchup with lecture content since I have been neglecting it a lot

Question 3 Study: List and discuss the three main points of the material covered this week.

- Learnt about Prolog in Lab 8 and understood why and how its used. Very interesting programming language and it was fun learning how it defines symbolic artificial intelligence and rule-based systems
- Got a refresher into Natural Language Processing (NLP). The basic concepts of NLP was easy to remember, however, I also learnt about word sense disambiguation and how it's used to identify the meaning of an ambiguous word based on its surrounding context.
- Brushed up on my First Order Logic aswell to better understand the lecture and lab content

Question 4 Insights: What was the single most confusing concept ('muddiest point) for you in this week's material, and what specific question do you have about it? –

- Learning the syntax of Prolog and creating a knowledge base was quite confusing initially. Took several attempts to import a Prolog knowledge base file but got there at the end. I found a Prolog cheatsheet online which helped immensely.

Question 5 Linkage:How could one key idea from this week's material be directly applied to your project?

- To be honest, most of the week's material is likely not to be used in the project. Got not much to say.
